**STANDING SEAM
METAL ROOFING PANEL**

IMMS - 1500

Best for Low Slopes

IMMS-1500 panels combine structural panel strength with architectural aesthetics. They are designed as a “bullet proof” roof. Each panel is folded onto the adjacent one. This creates a virtually waterproof seam for added inclement weather protection.

IMMS-1500 STANDING SEAM PANEL	Seam Height	Standard Panel Widths	Minimum Slope	Striated	2-Rib	Smooth	Rated UL 580 - Class 90	Tested ASTM E-1592	Tested ASTM E-1680, E-1646
